Mobile Application Systems and Design

FLUTTER LAB 4- CONSUMING APIs

Registration number: 223006944

Names: CYUZUZO Pacifique

Year 3

Lecturer: UKULIKIYEYESU (Mr Dieudonne)

Done at 17th Nov 2025

Section 2 — Application Screenshots

Screenshots below show all screens and features of the Posts Manager app.

2.1 Posts List Screen

The main screen shows all posts fetched from the JSONPlaceholder API. Each post displays its ID, title, and a short preview of the body. Users can edit or delete any post from this screen.

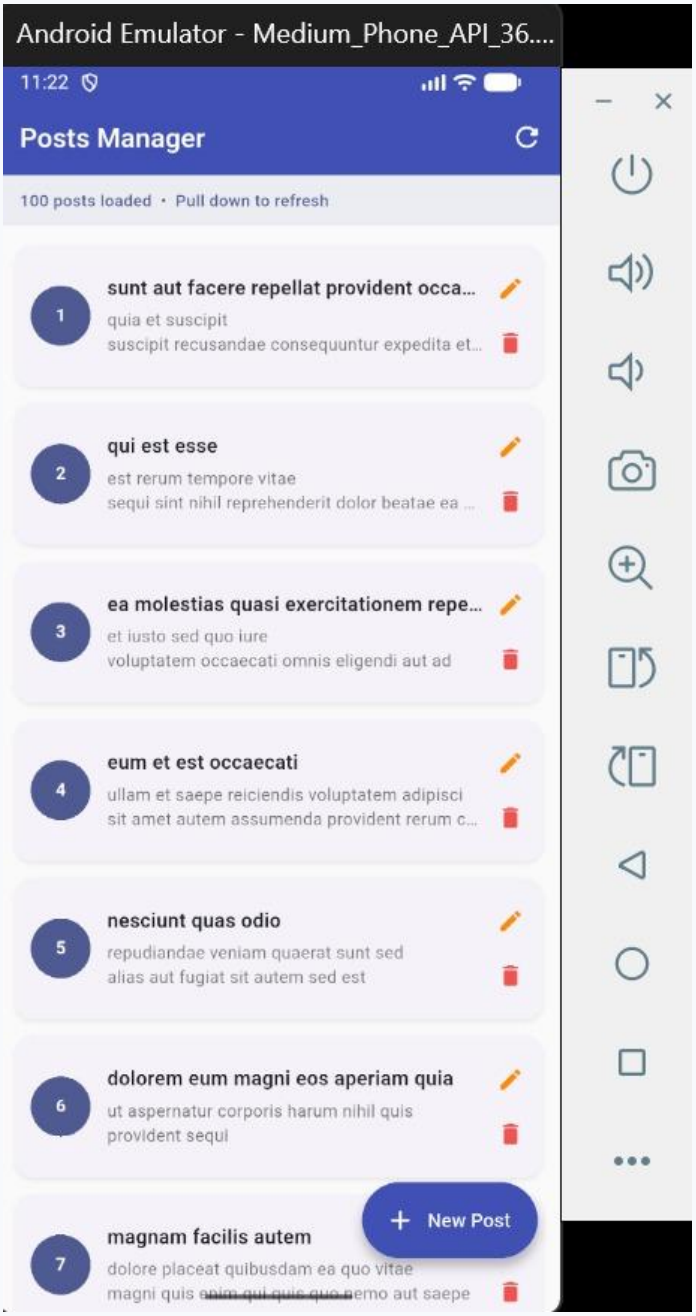

Figure 1: Posts List — all posts loaded from the API

[Screenshot goes here]

On the main screen → swipe down to trigger refresh → take screenshot while spinner is visible

Figure 2: Posts List — pull-to-refresh in action

2.2 Post Detail Screen

Tapping any post opens the detail screen, which shows the full title and body of that post.

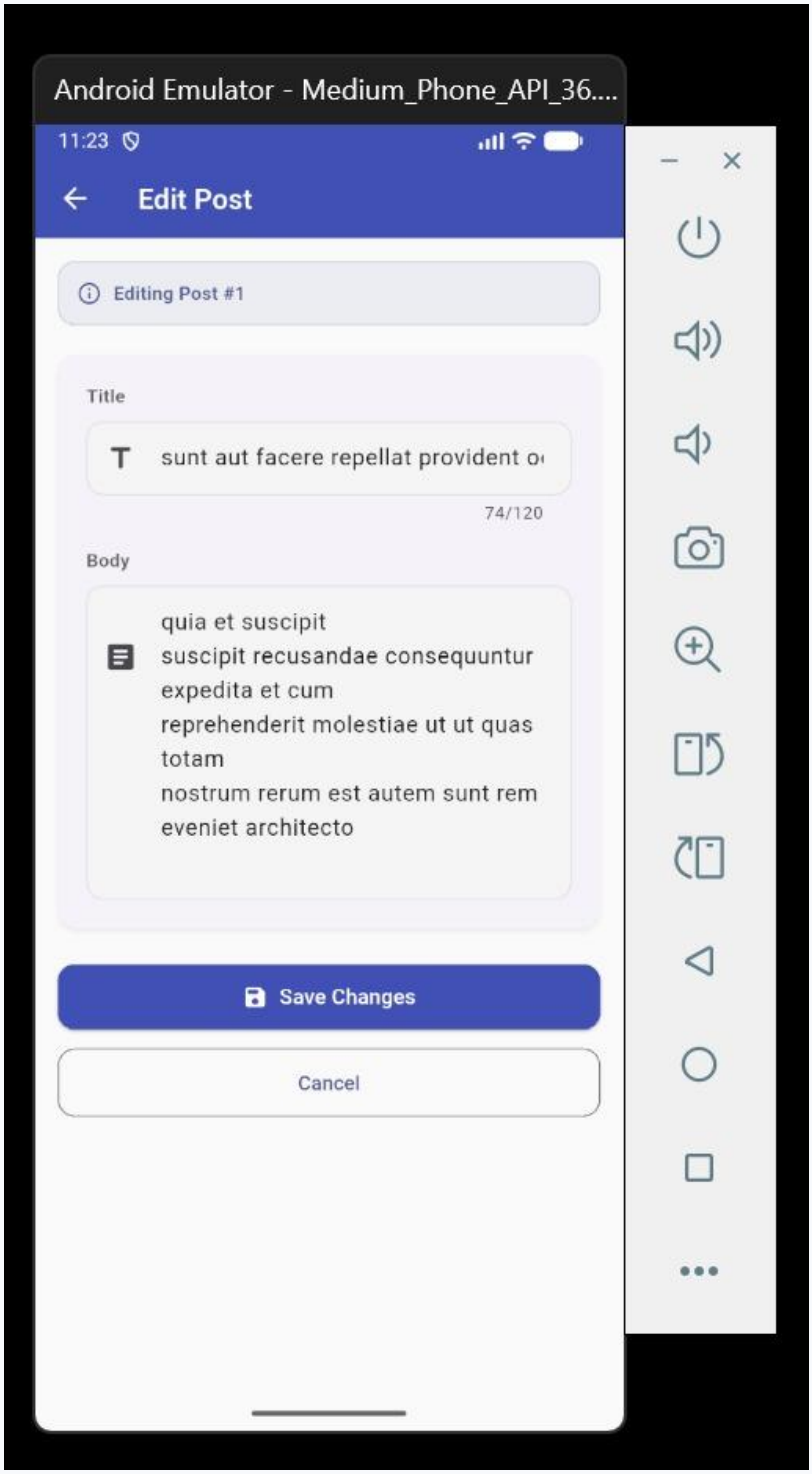

Figure 3: Post Detail — full post content

2.3 Create New Post

Tapping the '+ New Post' button opens an empty form for creating a new post.

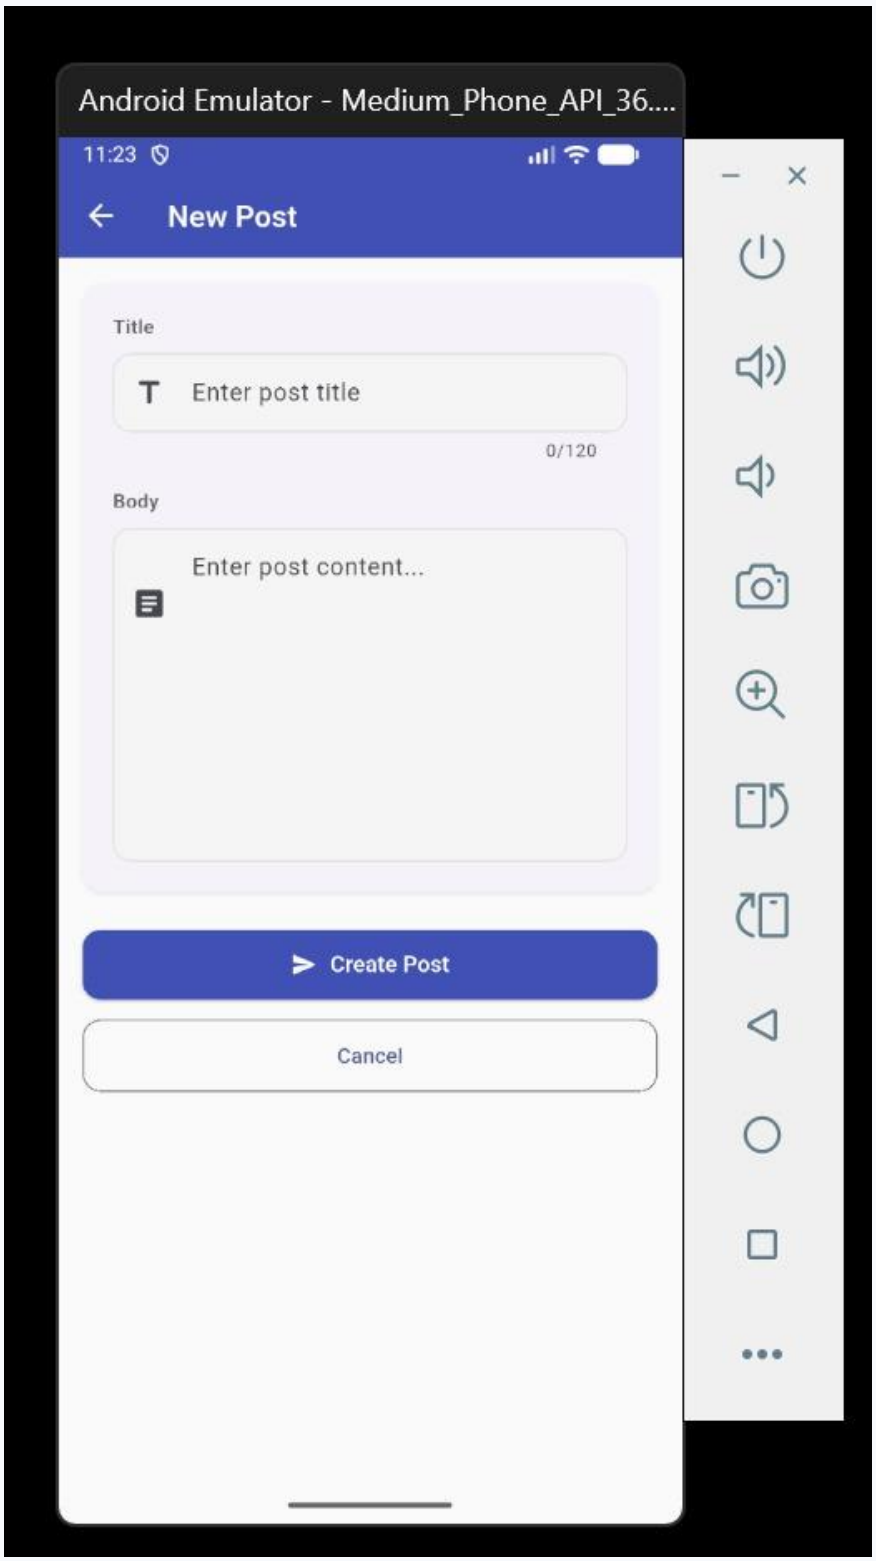

Figure 4: Create Post — empty form

[Screenshot goes here]

Fill in a title and body → take screenshot before pressing Save

Figure 5: Create Post — form filled in before saving

[Screenshot goes here]

Press Save → take screenshot of the green success snackbar at the bottom

Figure 6: Create Post — success message after saving

2.4 Edit Post

Pressing the edit icon on any post opens the same form pre-filled with the existing data.

[Screenshot goes here]

Tap the orange edit icon on any post → take screenshot of the pre-filled form

Figure 7: Edit Post — form pre-filled with existing data

[Screenshot goes here]

Edit the text and press Save → take screenshot of the success snackbar

Figure 8: Edit Post — success message after updating

2.5 Delete Post

Pressing the delete icon shows a confirmation dialog before deleting the post.

[Screenshot goes here]

Tap the red delete icon on any post → take screenshot of the 'Are you sure?' dialog

Figure 9: Delete — confirmation dialog

[Screenshot goes here]

Press Delete in the dialog → take screenshot of the green success snackbar

Figure 10: Delete — success message after deleting

2.6 Error State

If the device has no internet connection, the app shows a friendly error screen with a retry button instead of crashing.

[Screenshot goes here]

Turn off WiFi/mobile data → restart the app → take screenshot of the error screen
